ABOUT MYSELF

A designer with an enthusiasm in crafting user-centric, intuitive solutions for complex problems. My background in frontend web development and experience in both development and designing allows me to bridge the gap between design and implementation, ensuring that designs are both visually appealing and functionally feasible.

WORK EXPERIENCE

Corbado – Munich, Germany

City: Munich | **Country:** Germany | **Website:** <https://www.corbado.com> | **Business/sector:** Information and communication

User Experience Designer

[01/11/2023 – Current]

- Designed and developed four key tools for passkey integration across various platforms (web, iOS, and Android) making it accessible, responsive and intuitive using Figma and frontend technologies like NextJS, HTML, CSS, Javascript - State of Passkeys (<https://state-of-passkeys.io/>), Passkeys Analyser (<https://www.passkeys-analyzer.io/>), Passkeys Demo (<https://passkeys.eu/>), Passkeys Debugger (<https://www.passkeys-debugger.io/>).
- Led the design and implementation of interactive screens for the developer panel (<https://app.corbado.com/>), resulting in an increase in user satisfaction by simplifying complex user flows and enhancing the overall user experience. Delivered production ready visual designs artefacts aligned with design system.
- Created and optimised web pages, including FAQ, pricing, and blog sections, improving SEO rankings and increasing site engagement. Designed a comprehensive cheat sheet that boosted user retention by providing a clear, accessible guide to passkey implementation.
- Crafted visually compelling content templates and motion graphics for social media platforms like LinkedIn, Twitter, Product Hunt, Youtube. Designed intuitive data visualisations to simplify complex data for users.
- **Value Added** - Increased user satisfaction and interactivity, boosted content driven sales, enhanced developer productivity, helped expand market reach.

Technische Hochschule Ingolstadt – Ingolstadt, Germany

City: Ingolstadt | **Country:** Germany | **Business/sector:** Information and communication

Master Thesis - UX Researcher & Designer

[01/06/2024 – 18/01/2025]

- Conducted in-depth UX research to design Sahyog, a digital educational resource app aimed at empowering Indian families caring for elderly members with Alzheimer's symptoms.
- Carried out field research at Care Center (India) with interviews and observations to uncover key caregiving challenges, needs and pain points.
- Utilised Grounded Theory and thematic analysis to translate real-world insights into actionable design principles. Designed and iteratively tested a high-fidelity mobile prototype through remote usability testing and screen recordings.
- Developed app features including pre-diagnosis alert tests, gamified scenario cards, nearby care center search, and a secure community-driven support space.
- Focused on accessibility, trust, and cultural relevance, using Figma, Adobe Suite for design and synthesis.
- Project demonstrated measurable success in improving user's understanding of Alzheimer's and confidence in caregiving through feedback analysis.

 **Self Employed** – Jodhpur, India

City: Jodhpur | Country: India

UI/UX Designer

[01/03/2022 – 12/02/2023]

Designed an e-commerce website for a client in Jodhpur using HTML, CSS, Bootstrap which resulted in 15% increase in online orders in the first month.

Designed Hiring Platform “Hire”, simplifying the hiring process and job search functionality.

Proposed and designed a concept of “Bond - An audiobook”, allowing users to connect with absent loved ones by integrating ML-based personalised AI voices.

Designed a range of marketing materials, including brochures, flyers, and presentations, resulting in improved customer engagement.

 **Tata Consultancy Services** – Ahmedabad, India

City: Ahmedabad | Country: India | Website: <https://www.tcs.com> | Name of unit/department: Revenue Assurance - Business/sector: Information and communication

User Experience Engineer

[03/11/2020 – 02/02/2022]

Led the automation of UX workflows, improving operational efficiency and reducing revenue leakage in the telecom domain.

Collaborated with cross-functional teams to optimise network and mediation processes, ensuring system integrity with design compliance.

Ensured revenue integrity by analysing and optimising key processes across networking, CDR, mediation, and billing systems.

Developed scripts to automate workflows using Hadoop framework, MySQL and monitored KPI's to detect discrepancies. Therefore, improved operational efficiency and reduced revenue leakage.
